

TX STEM SPONSORSHIP Opportunity & Commitment

The National STEM League (NSL) is a practice league for future professionals. Thanks to sponsorship from the U.S. Army, you are invited to the one-day STEM Expo near Dallas on Thursday, Sept. 18, 2014 featuring project-based curriculum from the NSL to engage high school students and educators in concepts and careers ranging from race engineering to software+hardware innovation. Attendees are invited to activate the full sponsorship described below.

The Commitment to You:

Ten80's engineer-educators are committed to partnering with formal and informal educators to engage students in authentic, sustained STEM learning opportunities, helping dissolve barriers between science, math and project activities. Case studies, testimonials and research on the Ten80 curriculum and the network's effectiveness are available for download at StudentRacingChallenge.com.

Ten80 will host 30-50 students and any educators from interested and returning high schools on Thursday, September 18, 2014 at the Texas Motorplex in Ennis, TX (near Dallas). Attendees reserve the right to activate a full sponsorship which, depending on the challenge you choose, includes up to \$4,000 worth of non-consumable materials, STEM curriculum, training and entry into the 2014-15 National STEM League. Competition is optional. Collaboration and Creativity required!

Your Commitment:

Bring 30 - 50 students to the Ten80 STEM Expo to evaluate the initiative. Your commitment, should you choose to activate the sponsorship, is to participate in professional development and to integrate the curriculum into current or future programming as a course, club or camp.
