Success in STEM education comes down to good programs and great partnerships. Change the Equation has named Ten80's programs both exemplary and scalable. Your partnership at the classroom, club and regional level is key to scaling the exemplary outcomes in student achievement that are possible through the Student Racing Challenge and other Student STEM Challenges.

You are invited to take part in a face-to-face professional development meeting in Framingham, MA. This session is designed for those interested in learning more about Ten80 programs, those running Ten80 programs and new regional partners. A general session will start each day, then breakout sessions will focus on hub activities or key strategies for implementing the Student Racing, Computer Science, and Rover Challenges, including the integration of Enterprise and Innovation.

A continental breakfast and working lunch will be provided. Please RSVP to confirm your attendance at this session.
<http://www.ten80education.com/events/> . You will receive a confirmation e-mail that the minimum registration has been met by June 23rd.

For more event details, contact Maria McCarthy.
