TECH TRAINING for RACING CHALLENGE

November 21, 2016

4:00 PM – 7:00 PM

BOOKER T. WASHINGTON H.S

119 E 39th St, Houston, TX 77018

The goal of this half-day training is to help all participating teachers and coaches truly understand the technology at the core of the Student Racing Challenge, a one-tenth scale electric radio-controlled (RC) car.

Using the Race Engineering Certifications from Ten80's curriculum website as a guide, participants will learn preventive maintenance to avoid problems, learn how to diagnose and fix problems when they do arise and explore ways to optimize performance of the racecar and of the team itself. Webex support for curriculum and competition is included.

- Audience:** Middle & High school teachers and coaches
Bring: Cars, equipment, laptop and questions
Collaborate: Meet other STEM educators in your area who will be part of regional competitions.

Teachers or coaches who attend this training will earn Coach's points in the web-based National STEM League Points Race.

There is NO cost to attend.
