

Ten80 Student STEM Challenges

Professional Development

for Educators and Regional Partners
March 2 – 3, 2018 · San Antonio, TX

Gather in Support of Students

Success in STEM education comes down to good programs and great partnerships. Change the Equation has named Ten80's programs both exemplary and scalable. Your partnership at the classroom, club and regional level is key to scaling the exemplary outcomes in student achievement that are possible through the Student Racing Challenge and other Student STEM Challenges.

At this Spring 2018 session, Ten80's team will facilitate interaction between educators starting new programs, those experienced in running Ten80 programs and new regional partners at the Associate and Hub Organizer levels.

Each day will begin with a general session, then depending on who is in attendance, breakout sessions will focus on implementing various aspects of the Racing, Rover and Computer Science Challenges, including the integration of Enterprise and Innovation activities and specialization pathways including computer science and robotics.

Free for Current Partners in Education

Training is **free** for schools and organizations currently registered to use Ten80's curriculum for the 2017-18 or 2018-19 school years.
